Nefertiti Neck Lift

The extra stuff you may want to know!

Downtime

You may return to normal activities provided you follow the aftercare instructions provided. Redness, bruising, and swelling can last 1 - 4 days.

Results Last

Typically, results last 3 - 6 months depending on your lifestyle, genetics, and metabolism.

Risks & Adverse Effects

Like receiving any neurotoxin injections, there is a small risk of allergic reaction to the product. There is also a risk of the toxin traveling to areas other than the injection point causing uneven muscle relaxation. You do of course always need to make sure you are going to a highly recommended practitioner and follow your aftercare instructions carefully. Please see consent for full disclosure of risks and adverse effects.

How Does It Work?

Some muscles, such as the Platysma Bands, pull facial features downwards (depressors), while others balance this by pulling them upwards (elevators). Using muscle relaxing injections to relax depressor muscles allows elevator muscles to pull up specific features of the face without opposition. The result produces a tightening and smoothing effect.

Contraindications

- 1 Pregnancy and breastfeeding
- 2 The presence of an active skin condition in the treatment area
- 3 Known allergy or insensitivity to any botulinum toxin
- 4 History of/or active neuromuscular disease

FAQ's

Am I a good candidate for this procedure?

If you have loose jowls, a saggy neck, or want a more defined jawline and do not want to have surgery, then the Nefertiti Lift may be a suitable treatment for you. You will need to have a consultation to make sure this is the right option for you.

Does it hurt?

You may feel a small amount of discomfort from the injections but the treatment is very quick and minimally invasive.

What kind of results can I expect?

It takes around two weeks to see the results from this treatment but you can expect to have improved jawline and chin definition and lifting of the neck. Results are temporary however and will last four to six months.

How many units will I need?

Nefertiti Neck Lift Usually requires 50-100 Botox units to achieve the best result.
